Brief Education and Employment Survey for the Chicago Longitudinal Study

In cooperation with the Chicago public schools, we are conducting a brief follow-up survey to confirm your (or your child's if applicable) current educational and employment status. As you may know, our project staff have been in touch with you from time to time about your (your child's) educational experiences. We are now beginning the early adult phase of the research project. Information you provide will help school systems such as Chicago's better serve the needs of children and families. All information you provide will remain completely confidential. No one else will see this information.
